STOPPED SHORT Taking Tonics, and Built Up on Right Food.

The mistake is frequently made of trying to build up a worn-out nervous system on so-called tonics-drugs. New material from which to rebuild wasted nerve cells is what should be supplied, and this can be obtained

only from proper food. "Two years ago I found myself on the verge of a complete nervous collapse, due to overwork and study, and to illness in the family," writes a Wis-

It is the model village being constructed by the Russell Sage Foundation Homes Company (an offshoot of the Russell Sage Foundation) for the comfort of the clerk and the mechanic who has difficulty in finding within his means desirable quarters in the city.

The traveler along the line of the Long Island railway may already see beginnings of this remarkable community. Helow him, roads stretch across the small plain that flows between the track and the deep green forest in the middle distance. They are a little ragged in outline now, but promise to be lines of beauty when the borders are sodded and elipped. Young trees rise from the irregular shaped spots of green which are destined some day to be park spaces. Close by Italians are busily engaged in excavating cellars and layog concrete walls. NARRATIVE OF "COL. JACK"

Gen. John T. Casement at Franklin and His Famous Speech Before the Action There.

I notice in a recent publication the announcement of the death of our beoved general, John T. Casement, or Colonel Jack, as we of the brigade used to call him. Many instances come to mind of the Atlanta campaign, where he played a conspicuous part. He always had a pleasant word for the private soldier. One day in North Carolina, just before Johnston's surrender, the writer happened to be on guard near Casement's headquarters on a road that he passed several times in a few hours, and as it was military rule to salute an officer, of course, we gave salutes every time he passed, writes A. McBride, Company F. Sixty-fifth Indiana, of Marionville, Mo., in the National Tribune. The

By four o'clock, when looking to the gether, saw that our guns and ammu nition were in good order, took our places behind the works, and, shall I say? calmly waited the onslarght. It was an apparent calm, for there was a tempest brewing in the breast of every man. They were steeling their nerves for the great conflict that all knew was almost upon them. About this time General Cox and staff rode up and took a look at the front. About this time a familiar voice was heard to our left. Looking in that direction. we saw Colonel Jack, who was only a few moments from a great event of his life-that was to change him from Colonel Jack to General Jack Casement. He was encouraging the boys to do their best. When he came in the rear of our company he made what General Schofield termed his famous speech, but the captain did not quote quite all of it.

The growth of the crusade against

shown to good advantage in the two directories that have been lasged by he National Association for the Study and Prevention of Tuberculosis and he one in preparation. The first tuerculosis directory published in 1904, by the tuberculosis committee of the New York Charity Organization Socie ty and the National Association listed 33 sanatoria and hospitals for consumptives in the United States, for some of which preliminary provision only has been made. The combined apacity of these institutions was only 8,000 beds. Thirty-two special dispensaries and thirly-nine anti-tubercuosis organizations sommed up practically all of the fighting force enumerated in the first directory. The second directory was prepared by the National Association for the study and Prevention of Tuberculosis and published under the auspices of the Russell Sage Foundation in August, 1905. This directory listed 240 sanatoria and ospitals, an increase of 107 from the ormer directory; 158 dispensaries, an crease of 126; and 195 associations, an increase of 156. The number of ospital beds listed in 1908 was 14,014.

The new directory that will be issued soon, will list over 400 sanatoria and hospitals with a bed capacity of nearly 25,000; more than 300 special tuberculosis dispensaries; and fully 450 anti-tuberculosis associations and committees. Since the first directory was issued in 1904, the increase in the number of agencies fighting consumption aggregates nearly 500 per
